

# School Trip

**On Tuesday 9<sup>th</sup> of June 2009 P4a and Miss Milne went to Glencorse Water Works. The people that came with us were parents, Mrs Stewart and Mrs Hepplewhite. I was playing in the bus with Nicola as well. When we got there we went in to groups I was in the first group.**

**We walked around the building site, we met Lynsey and Neil and some builders. Lynsey and Neil showed us around. We saw 142 sighs there were 4 cranes as well. We even got our picture taken. We were really hungry when we came back round.**

**Lynsey said that the water works would be finished in 2011. After lunch we went pond dipping we caught lots of water creatures like shrimp, water worms and fish. The worm that I caught was orange and short. We only noticed we had a fish was when I looking in the tub. After pond dipping we played tag but not normal tag.**

**After the pond dipping we went for a walk up the Pentland Hills it was tiring! After that we went to the pipe factory where pipes are made. I was quite amazed that pipes were made of plastic pellets. We even could hear our echo. At last we had to go on the bus back to school.**
