

## THE TRIP

On Tuesday 9<sup>th</sup> of June 2009 we went to Glencorse Water Treatment Works and it was very exciting. We went with Miss Milne and the bus driver took us there. The parents, Mrs Stewart, Mrs Hepplewhite came too. When we got there we met Neil and Lynsey and they showed us around the water works. We went because water is our topic and we needed to find out questions we don't know about.

We saw four humongous cranes. Then we went to see a huge and wide building, there was a fence covering it in case we fell. We went down some steps so we could get a closer look. Then we went to another place and a man came so we gave him some questions about the pipes. They had to be fifteen kilometres long and we asked him where the pipe making machines came from and they came from Finland. Then we saw a big excavator.

Then we looked at some more awesome places. Then we went back to have our lunch it was so noisy I couldn't hear myself talk.

After lunch we waited for rangers. Finally they were here so we started to walk. While we were walking we stopped to play a bucket game after we had finished the game we walked a bit more and also we played pond dipping it was really fun. In the end we went back to Cornbank School.
